

ISO 3834 Welding technology

Text M. Beljean, Images: Wikipedia

This standard regulates the quality requirements for the company and regulates principles to the quality assurance of welded products. How and in which manner do you weld, how are your welded products produced and controlled?

Do you have customers, which expect a confirmation about your welding work from you?

Once is welded, the additional quality inspection is almost not possible, only with very high expenditure. According to the range of application there are different application standards and legal rules to comply. The standard ISO 3834 divides itself in three levels:

- comprehensive quality
- standard quality
- elementary quality

The added value for you with an ISO 3834 certification:

It demonstrates your customers, partners, employees and authorities that you take over responsibility with this management system. With the quality management system you record the quality of your work on international level.

QS ZÜRICH AG

Your partner in certification

Benefit from our experience right from the start!
